Dear colleagues,
Dear representatives of National Geriatric Societies,

The board of the EAMA is looking for enthusiastic geriatricians to join the XIIIth EAMA course starting January 2019.

For this purpose, we would appreciate if the national societies could support and/or co-finance promising geriatricians to enable them to join the course.

As you are aware the European Academy for Medicine of Ageing (EAMA) was founded in 1995 to develop capacity, competence and leadership in geriatric medicine in Europe. To equip geriatricians with the necessary knowledge, skills and behaviours to further drive forward geriatric medicine in their own countries and at the European level, the competency-based curriculum is recently adapted to the new challenges in Geriatric Medicine.

To learn more about EAMA's learning objectives and course, we invite you to consult our website at <https://www.eama.eu/mvc/index.jsp>

For those European countries who don't have an established geriatric discipline or national organization, EUGMS supports the attendance of 3 promising geriatricians with a scholarship. Please motivate your promising geriatricians to apply for a scholarship <https://www.eama.eu/mvc/application.jsp>

We hope we can welcome many enthusiastic geriatricians from across Europe.
Kind regards.

On behalf of the executive board

Prof Dr Nele Van Den Noortgate
President of the EAMA
